SENSODYNE Sensitivity & GUM

Tooth sensitivity & concerned about the health of your gums?

meatth of your gums?

Many people with sensitive teeth also worry about their gum health. Tooth sensitivity can occur when exposed dentine comes into contact with cold, hot, sweet and sour. With twice daily brushing, healthy gums can be maintained by defending against a build-up of plaque bacteria.

Builds a protective layer over the sensitive areas, effectively relieving tooth sensitivity. Micro foam formula penetrates hard to reach areas in between teeth and along the gumline. Twice daily brushing helps to remove plaque, and helps maintain healthy gums.

Dual action for TOOTH SENSITIVITY & HEALTHY GUMS*
