Panadol Extend 

INDICATIONS
Panadol Extend is used to give long lasting relief of pain associated with osteoarthritis, backaches, mild to moderate joint pains and muscular aches such as sprains, strains, and sports injuries.
Panadol Extend is also suitable for headache and migraine.

DESCRIPTION
Each sustained release caplet contains 665mg of Paracetamol. The caplet also contains Hypromellose, Pregelatinised Starch, Povidone, Magnesium Stearate, Croscarmellose Sodium, Stearic Acid, Triacetin, Carnauba Wax.
Caplet is a white to off-white capsule shaped film-coated tablet debossed with "8" on one side and blank on the other.

DOSAGE
For oral administration only. Do not exceed the stated dose. Use the smallest dose that you need to treat your symptoms and use the medicine for the shortest period of time necessary. Do not take more

frequently than every 6 hours. Do not use this medicine if you are taking any other prescription or non-prescription medicines containing paracetamol to treat pain, fever, symptoms of cold and flu.

Adults (including the elderly) and children over 12 years: Take 2 caplets three times a day, every 6-8 hours as required. Do not take more than 6 caplets per day.
Children under 12 years: Not recommended for children under the age of 12 years.

ADVERSE REACTIONS
Stop taking this medicine and tell your doctor immediately if:

- You experience allergic reactions such as skin rash or itching, sometimes with breathing problems or swelling of the lips, tongue, throat or face.
- You experience any skin rash or reaction. Symptoms of serious skin reactions may include skin reddening, rash, blisters and separation of the upper surface of the skin from the lower layers. These serious skin reactions are rare, but can occur even if you have taken this medicine in the past without any problems.
- You experience mouth ulcers.
- You have previously experienced breathing problems with aspirin or non-steroidal anti-inflammatories, and experience a similar reaction with this product.
- You experience unexplained bruising or bleeding. These reactions are rare.

PREGNANCY
Talk to your health care professional before taking paracetamol if you are pregnant.
Consider taking the lowest effective dose for the shortest period of time. You can take this product whilst breastfeeding.

DRUG INTERACTIONS
Before taking this medicine, make sure you consult your doctor if you are taking Warfarin or similar medicines used to thin the blood.

CONTRAINDICATIONS
Do not use if you are allergic to Paracetamol or any of the other ingredients in the product.

WARNINGS AND PRECAUTIONS
Taking too much paracetamol can cause serious harm to your liver. Always read and follow the label.
Check with your doctor before use if:

- You have liver or kidney problems.
- You are severely underweight or malnourished.
- You regularly drink alcohol.

You may need to avoid using this product altogether or limit the amount of paracetamol that you take. If you have a severe infection, are severely malnourished, severely underweight, or are a chronic heavy alcohol user, this may increase the risk of metabolic acidosis.

Signs of metabolic acidosis include:

- Deep rapid, difficult breathing
- Feeling sick (nausea), being sick (vomiting)
- Loss of appetite

Contact a doctor immediately if you get a combination of these symptoms. Please see a doctor if your symptoms do not improve.
If you have had a serious skin reaction with this medicine, do not take it or any products containing paracetamol or acetaminophen again. Doing so could cause you to have another serious skin reaction.
Please see your doctor if your symptoms do not improve.
Keep out of sight and reach of children.
