

Drug Facts		Drug Facts (continued)
Active ingredient Stannous fluoride 0.454% (0.15% w/v fluoride ion).....	Purposes Anticavity, Antigingivitis, Antihypersensitivity	Directions • adults and children 12 years of age and older: • apply at least a 1-inch strip of the product onto a soft bristle toothbrush. • brush teeth thoroughly for at least 1 minute twice a day (morning and evening), and not more than 3 times a day, or as recommended by a dentist or doctor. Make sure to brush all sensitive areas of the teeth. Minimize swallowing. Spit out after brushing. • children under 12 years of age: Consult a dentist or doctor.
Uses • aids in the prevention of dental cavities. • helps control bleeding gums. • helps interfere with harmful effects of plaque associated with gingivitis. • builds increasing protection against painful sensitivity of the teeth to cold, heat, acids, sweets, or contact.		Other information • products containing stannous fluoride may produce surface staining of the teeth. Adequate toothbrushing may prevent these stains which are not harmful or permanent and may be removed by your dentist. • this product is specially formulated to help prevent staining. • do not store above 30°C (86°F)
Warnings Stop use and ask a dentist if • the problem persists or worsens. Sensitive teeth may indicate a serious problem that may need prompt care by a dentist. • pain/sensitivity still persists after 4 weeks of use. • gingivitis, bleeding, or redness persists for more than 2 weeks. • you have painful or swollen gums, pus from the gum line, loose teeth, or increasing spacing between the teeth. These may be signs or symptoms of periodontitis, a serious form of gum disease. Keep out of reach of children. If more than used for brushing is accidentally swallowed, get medical help or contact a Poison Control Center right away.		Inactive ingredients glycerin, PEG-8, hydrated silica, pentasodium triphosphate, flavor, sodium lauryl sulfate, titanium dioxide, polyacrylic acid, cocamidopropyl betaine, sodium saccharin

SENSODYNE SENSITIVITY & GUM

Tooth sensitivity & gum problems?
Many people with sensitive teeth also have gum problems. Tooth sensitivity can occur when exposed dentin comes into contact with cold, hot, sweet and sour. Early gum problems are caused by a build-up of plaque bacteria, which can lead to redness, swelling, and bleeding.

Dual Action for TOOTH SENSITIVITY & GUM PROBLEMS

Why use Sensodyne Sensitivity & Gum?
Sensodyne Sensitivity & Gum contains a clinically proven ingredient to relieve tooth sensitivity and improve gum health. It builds a protective layer over sensitive areas, effectively relieving tooth sensitivity. It targets and removes plaque bacteria associated with gingivitis, to help reduce swollen, bleeding gums. You can deal with both these concerning problems with one specialist toothpaste. Sensodyne Sensitivity & Gum is a daily fluoride toothpaste.

*with twice daily brushing
